

Product Information

PC-64

PRODUCT DESCRIPTION:

- **PC-64** is a silicone glycol copolymer additive that is supplied at a 52% concentration in dipropylene glycol monomethylether for use in inks and coatings for leveling and uniform coating properties.
-

TYPICAL PROPERTIES *

PROPERTY	VALUE	UNIT
Appearance	Clear liquid	
Color, Gardner, maximum	2 max	
Solid content %	52	
Solvent	Dipropylene Glycol Monomethylether	
Specific gravity at 25°C	0.99	
Viscosity at 25°C, cps	40	

*: The above information is given only as a listing of typical properties and is not intended to be representative of product specifications. Please contact the Quality Assurance Department for current product specifications.

ADDITIONAL INFORMATION:

- **PC-64** is used in water-borne coatings and ink formulations to provide rapid substrate wetting as well as improved flow and leveling. It does not affect the re-coatability of the surface.
- **PC-64** does not impart pin holes or fisheyes in coatings, ensuring a uniform finish across many substrates.
- **PC-64** is added at 0.1 – 1.0% weight percent based on the total formulation. It can be added during any stage of the processing.
